

## President

Sandy Medendorp I am a retired construction insurance professional of 35 years who started out as high school English teacher. Along the way I taught college level insurance classes and earned an MBA. I am very grateful to be considered as a contributor to the success of TELOS. I would love to continue bringing my “can do” enthusiasm and administrative/managerial experience to a super council team. (Continuing as an at-large member of the Council)

## Vice President

**Edie Heppler.** I have been an accountant/administrator and business owner since 1977. I have lived in Bellevue since 1962 and have one son and two grandchildren. I never had the opportunity to attend college, so the TELOS program has allowed me to expand my knowledge. After 7 years of attending classes I have found my tribe! I would like others to have this same opportunity so am passionate about expanding this program and making sure every Boomer and Senior, in our area, knows about this program. I would like to keep TELOS vibrant, engaging, available and affordable to all. The challenge will be to grow the program and still maintain the community flavor. I hope to serve, as the Vice President, of the Council supporting leadership and interest, keeping a collaborative atmosphere where all our wonderful experience can come together and work toward maintaining and growing TELOS thru this student organization.

## Secretary

**Alexa Munoz.** The Secretary records and communicates information on decisions that coordinate policies and activities within the TELOS Student Organization (TSO). Information coordination gives the TSO Council the opportunity to reach its goals collaboratively and cooperatively with TELOS participants and college administration. While working in educational institutions earning funds for my college education, the secretarial skills I developed as a teen-ager now allow me to continue my commitment to public service in promotion of life-long learning. I currently am Secretary of the Curriculum Committee, and recently served as Secretary for 3 years in a non-profit organization.

## Treasurer

**Ted Watts.** Retired from the private practice of law 5 years ago after 50 years locally in the civil litigation field emphasizing business and real estate disputes. Received a lot of exposure to financial reporting in the law practice and also has a good understanding of the legal/statutory parameters within which the TELOS program operates financially. Have served on board of another non-profit with financial reporting and oversight obligations.

One-year experience on the TELOS/TSO Council. Currently on the "Task Force" created by the President to deal with TELOS tuition negotiations with Bellevue College. Currently on the "Budget Committee" established by the current Treasurer. Instructor in three different classes at TELOS.

Believes in establishing regular and simplified procedures to conduct the financial reporting and affairs of the TELOS program most effectively.

## At-Large Council Members

**Arlene LaTurner.** I'm retired from working for a group of orthopedic surgeons where I did medical transcription, scheduled and coded surgeries, and finally was their bookkeeper. About two years after retirement I saw a brochure for Telos at the Redmond library and signed up for classes. Many years later I am still getting social and intellectual enrichment from the classes, seminars (and parties!) Telos offers. I want to use the member-at-large position to continue supporting and promoting the Telos community.

**Carol Corday Leyton.** My husband, family and I moved here in 1974 and have been involved in the community ever since. I was PTA president at Cherry Crest Elementary after volunteering there for many years and the recipient of the Golden Acorn Award for my service. Then I became president of the PTA at Odle Middle School. I have been president of the Overlake Hospital Auxiliaries and chaired the hospital Bandage Ball auction several times. Besides that I also served on the Board of Trustees at Overlake and also on their Foundation Board and served on the Board of Temple De Hirsh Sinai. Probably my biggest asset would be I was on the founding board of Kids Quest Museum in Bellevue so I can now deal with all ages with problems. After all my community volunteering I found myself at loose ends and a friend in one of my exercise classes mentioned TELOS which has been a perfect game changer for me. I've taken an assortment of classes for the last 10 years and when my husband Bryan retired he joined me with as much enthusiasm as I had. We have 3 married daughters, 2 in the Seattle area and one in San Francisco and best of all 8 perfect grandchildren. I would be happy to serve on the TELOS Board with some good experience behind me.

**Paul Maffeo**, Seattle U Ba, Cum Laude, political science, mba u of w, captain UN staff Seoul Korea, US Post office regional manager, investment adviser 40 years. Investment advisory committee city of Seattle pension board, act theatre & Bellevue arts commission. Currently arbitrator FINRA, board TELOS & eastside heritage center, part owner Ross plaza. TELOS is a wonderful community asset that needs to be preserved & nourished.

**Gerald Harkleroad** I was raised in Ferndale, Wa. A BA in Geography from U of Wash. 1960. Worked as a City Planner in Vancouver, Wa., Missoula, Mt., and Juneau, Ak. In 1974 formed M and H Development Co., developing over 1500 single family lots for homes throughout the Eastside and South King County. Built a three story Office Building in Eastgate and a 250 unit Apartment Complex in Burien. Earlier years worked in the Salmon fishing industry and a short stint as a Copper Miner in Butte, Mt. I have been taking Telos classes for 15 years, a member of the Events Committee for the past 8 years and as a Chairman for 4 years running the Elections, Summer Picnic and the Holiday Party. My interest in becoming a Board Member is to continue to bring a greater variety of courses and seminars and to build a greater awareness of the Telos success story to our Community.

**Chuck Kimbrough** I am a semi-retired 45 yr. trial lawyer, retired Colonel, with interests in current affairs, politics and history. I have greatly enjoyed Telos classes and events. I put my skills to use since spring of 2014, along with a small team, in negotiating a number of items, including tuition reductions with BC. We substantially improved the TSO and TELOS student relationship with senior BC administration but still have bumps and headaches to overcome with middle management which will take some time & persistence. I also would like to help kept this great academic community program vibrant and grow it substantially.

**Tim Hay** I guess I'm a Telos 'lifer'. This is my 23rd year. I was on the TSO Board during 2013-'14, and was our 'point' in the Feb., '14 fending-off of an earlier effort to raise our tuition to \$125 I was TSO Vice President in 2014-'15, and am once again the '18-'19 V.P. I am co-founder of our Constitution Club. I've served on all our committees, & currently am Chair of the Strategic Planning Committee, Education: Whitman College, B.A., Econ; Stanford Business School, MBA, Marketing. I owned a Bellevue homebuilding company for 27 years, and have many initiatives and ideas I hope to see completed this next year for TSO. Thanks for your vote!

**JoEllen Schill** My name is JoEllen Schill, and I have been taking classes at TELOS for the past 10 years. Before discovering TELOS I was an Interpersonal Resource Consultant and lecturer. The topics were about living and interacting In the world of singles, with an emphasis on the various opportunities singles have in the world. I owned my own company called "Minglemania" and for several years worked with corporate and social venues.

I also worked as a host for social get-togethers through Discover U, planning and facilitating activities every other week throughout the city for people wanting to meet new as well as make new friendships. I believe many of the original folks that joined the group still remain connected and socially active to this day.

For six years I wrote a monthly "who's who" column for the Bellevue Club magazine. Interviewing many of our city icons helped me learn a myriad of knowledge about business. I believe that opportunity peaked my quest to keep learning. And that is when TELOS came into my life.

I am running for the position of Member at Large, hoping to give back to a program I have enjoyed so much.

By the way, this is not only about classes it includes the friends I've made and the camaraderie I have developed through TELOS.
